re: R Val Docs Security

Situation: I will be moving to Pac
tomorrow with all R val docs
& these must be made secure.

Data: In PPRO has sent for
Shirley Lyman (CIC PPRO Bu) ord
me (Research) to transfer to Pac
so she can continue to get
the Bureau while doing her work.
He has also just told me
that I'm to be per record on the

mission.

②

We will set up in the
Pres PPO office on the 1st floor.

I am in-charge of all
H.H. val docs. This includes
manuscripts, personal docs,
letters, signed books etc. Plus
artifacts. These form the back-
bone of documentation for the R
Biography - a vital part which
I will be contributing here.

These docs are incredibly
valuable - both in terms of
PR value & actual collection.

worth. Probably ⁽³⁾ they are worth
a couple of million in actual
cash.

There have been a number of
thefts here & if word of these
does leaked out they would be
the target of thieves.

The room is at risk from the
doors & windows. ~~needed~~
are dead bolts on both doors
& heavy screening over the 2
windows.

I have been over the job with
the H&M 1/C & Treas Sec & they

④

know what's ~~needed~~ needed
& will provide the financial
data on supplies needed.

(I will sleep in the
space until the new locks
& window grating installed).

These doors can never be
replaced & are just too
valuable to the future success
and safety of R to not take
all precautions possible.

Solution:

① the plan of 2 new Schlage

(5)

DeBotts + window security
screens installed be approved.

② HKM Treas sec to get
the financial data + attach
PO.

③ HKM Engineer to install
the locks + screens.

this is ok

MemD ok _____

MemD not ok _____

Dear Gerry,

Putting up bars on windows
is a no-go (Harvey has specifics).
What we'll do is put the
real valuables in the closet (huge)
(it's actually a small room!) with
no windows & a lockable door
which is inside RTC space which
has a large lockable door & is
also very very close to where
CESO Security Desk is & CEC
which is always occupied - so
it is a very secure space.

Dear Laurel,

Have tried to call you several times today - before & after your dinner time but no answer.

Going fine. Bogged today due to full day of repair breakdown but repair guy will be here early in a.m. & will be operational again.

Much P.C. stuff I'm going to just send in boxes. Too much to copy. Tons of signal handwritten stuff & stuff OVA would use. It's somewhat sensitive but we'll find a good place for it there.

Did I send the job # yesterday?
(813)- 447-7493.

Frank McAll has been doing his
own artifacts collection on the side.
in addition to the ship artifacts.
He is really enthused about it all
and is going to go on the Museum.

Did you know A.H. audited Jimmy
Doalittle? neither did I. This per
Hank Billings.

See you Saturday.

M. Love
